

DeFi Ecosystem Wallet Staking

Crypto Organization
Focused on Mass
Blockchain Solutions

Bitgert

Introduction

Bitgert is a crypto engineering organisation focused on blockchain technology products and audits solutions, While our \$BRISE token benefit investors through staking in BUSD rewards and our smart contract also has a buyback function which helps in the price growth of our token and makes it more scarce.

\$BRISE Token will be used as peer-to-peer (**P2P**) service for payment systems using our dApp wallet in the local currency with zero transaction fees, faster & secure transactions, whereby two individuals interact directly with each other, without intermediation by a third party. Instead, the buyer and the seller transact directly with each other via the **P2P** service.

TOKENOMICS

Total 12% Transaction Fee (5% BuyBack, 3% Marketing, 4% BUSD Distribution to Stakers)

BUYBACK TAX: 5%

MARKETING TAX : 3%

BUSD DISTRIBUTION TAX : 4%

WHAT IS BUYBACK?

If a stock has low value and the potential to perform better in the future, companies often announce a buyback of the stock in the open market.

Once companies announce the buyback, investors gain more confidence to purchase and hold.

Additionally - the demand increases which ultimately will drive the price up.

At **\$BRISE**, we choose to apply the Buyback concept to cryptocurrency, and make our token more attractive to hold.

HOW DOES BUYBACK WORK?

\$BRISE collects a 5% Buyback tax on each transaction, which is stored inside the contract. Whenever a sell occurs, a fraction of the buyback amount is used to automatically purchase tokens from the liquidity pool. Those tokens are immediately burned after purchase.

What's So Great About That?

There are 3 advantages:

1. Raise in Value

After the tokens from the Liquidity pool are bought, the new BNB amount is added to the pool and the amount of the tokens are reduced, which results in an increase in price.

2. Free BNB

Once those tokens are burnt, it is like adding free BNB to the pool as there are no tokens to sell in the future.

3. Trust & Reliability

Investors can be relentlessly hesitant and often get spooked by a bearish market.

Because of the automatic buyback, investors will never see more than 2 sells in a row (98% of the time)

ROADMAP

Launch Phase

Website Launch
Contract Deployment
DEX Listing (PancakeSwap)
Advertising Campaigns
1,000 Holders
CoinGecko Listing

Growth Phase

3000 Holders
Influencer Promotions
Coinmarketcap Listing
Initial CEX Listing

Expansion Phase

20000 Holders
Audit Solutions
dApp Wallet Development
Major CEX Listings
Techrate Audit
Media Promotions

Utility Phase

35000 Holders
Payment System (P2P)
DEX Integration in dApp wallet
Media Coverage Campaigns

Lending & Exchange Phase

50000 Holders
P2P Lending Platform Development
Centralised Exchange Development
Revenue Sharing Staking program
Charity Foundation

Blockchain Phase

100000 Holders
Blockchain Development
Roadmap V2.0 (Relaychain,
Parachain, Smartcontracts)

Benefits for Everyone

\$BRISE Token is not only limited for Buy / Sell / Hold, But also has a real use case of payment system utility globally & also can be used for P2P lending.

#Earn

#Spend

#Lend

We've Built A Token That Rewards In BUSD To Our Investors

Static Rewards

Get rewarded 4% of every transaction in **BUSD** just for staking

Buy Back system

5% of each transaction adds to the buyback wallet so we can do regular buy backs

Regular Burns

All tokens that we buy back we will burn, making price impact greater.

Thank you

Have a great
day ahead.

STAY TUNED
